

## Cookie Statement

Select Fabrication & Engineering and our third-party providers use cookies on our website and similar technologies to store and manage user preferences, deliver targeted advertising, enable content, and gather analytic and usage data. The use of cookies and other tracking technologies is standard across websites and apps through which information is collected about your online activities across applications, websites, or other services.

### What are Cookies

Cookies are small pieces of text that are placed on a computer or other device and are used to identify the user or device and to collect information.

### Types of Cookies and why we use them

- Absolutely necessary cookies

These cookies are essential to enable you to move around a website and use its features. Without these cookies, services you have asked for, like adding items to an online shopping cart, cannot be provided.

- Performance cookies

These cookies collect information about how you use our website. Information collected includes, for example, the Internet browsers and operating systems used, the domain name of the website previously visited, the number of visits, average duration of visit, and pages viewed. These cookies don't collect information that personally identifies you and only collect aggregated and anonymous information. Performance cookies are used to improve the user-friendliness of a website and enhance your experience.

- Functionality cookies

These cookies allow the website to remember choices you make (such as your username or ID, language preference, or the area or region you are in) and provide enhanced, more personal features. These cookies can also be used to remember changes you have made to text size, fonts and other customisable parts of web pages. They may also be used to provide services you have asked for, such as watching a video or commenting on a blog. The information these cookies collect may be anonymised, and they cannot track your browsing activity on other websites.

- Targeting and advertising cookies

These cookies track browsing habits and are used to deliver targeted (interest-based) advertising. They are also used to limit the number of times you see an ad and to measure effectiveness of advertising campaigns. They are usually placed by advertising networks with the website operator's permission. They remember that you have visited a website and this information is shared with other organisations, such as advertisers.

### Managing Cookies

You can manage website cookies in your browser settings, and you always have the choice to change these settings by accepting, rejecting, or deleting cookies. If you choose to change your settings, you may find that certain functions and features will not work as intended. All browser settings are slightly different, so to manage cookies, you should refer to the relevant settings within your browser.

We understand that you may want to know more about cookies, and how you manage your cookie preferences. The following third-party websites can provide you with more detailed information.
